

# **FIBER-REINFORCED VEHICLE INTERIOR TRIM AND METHOD OF MANUFACTURE**

## **ABSTRACT OF THE DISCLOSURE**

Fiber-reinforced vehicle interior trim and a method of manufacturing interior trim in a  
5 one-step molding process. A skin material and fibrous reinforcement mat are located in a  
molding tool. A moldable foam-forming material is applied to the tool between the skin material  
and the fibrous reinforcement mat. The foam-forming material penetrates the mat and expands  
and cures such that the foam binds to both the skin and the reinforcement mat to produce a  
molded interior trim piece.
